DETAILED ACTION

This application is a continuation of 08/576,240, issued as U.S. Patent No. 6,074,862.

The response filed on September 19, 2003, has been entered.

Claims 1 and 22-25 are pending.

Response to Arguments

Applicant's arguments filed on September 18, 2003 have been fully considered but they are not persuasive.

The declaration filed on March 21, 2002 under 37 CFR 1.131 has been considered but is ineffective to overcome the Davis et al. (U.S. Patent No. 6,541,605) reference.

The Davis et al. (U.S. Patent 6,541,605) reference is a U.S. patent or U.S. patent application publication of a pending or patented application that claims the rejected invention. An affidavit or declaration is inappropriate under 37 CFR 1.131(a) when the reference is claiming the same patentable invention, see MPEP § 2306. If the reference and this application are not commonly owned, the reference can only be overcome by establishing priority of invention through interference proceedings. See MPEP Chapter 2300 for information on initiating interference proceedings. If the reference and this application are commonly owned, the patent may be disqualified as prior art by an affidavit or declaration under 37 CFR 1.130. See MPEP § 718.

The reference of Davis et al. claims a polypeptide that is 100% identical to the polypeptide of claim 1 of the instant invention.

Claim Rejections - 35 USC § 103

Claims 1 and 22 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Davis et al. in view of Smith.

Since the 1.131 declaration cannot overcome the rejection of claim 1 under 102(e), applicants arguments are moot.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 23-26 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 6,074,862. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are claiming common subject matter, as follows: polypeptide variants of SEQ ID NO:2 as defined in Claims 1-2 of U.S. Patent No. 6,074,862.

No claims are allowed.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
